Synopsis:

Germany, May 1945, deep in the Harz mountains a U.S. tank crew discovers a platoon of Germans preparing to ambush U.S. supply trucks. Joined by a British officer, cut off from his unit, a deadly game of cat and mouse quickly unfolds as the Allies find themselves out-gunned and out-manned by three German tanks. Tension and fear begin to grow as the crew reluctantly decide they must stop the enemy from executing their deadly plan. Knowing that hundreds of lives are at stake they must put aside their differences and work together to fight a desperate battle against the greatest odds they have ever faced.

We like it because:

Easily living up to the reputation of its predecessor, "Saints And Soldiers – The Void" is a solid, nail-biting wartime action movie bolstered by a tremendous attention to detail, strong characterization and thrilling tank battle sequences. It also carries a huge emotional clout rarely seen in action movies. A must-see for war movie fans.
