Synopsis:

It's Jack's 10th birthday, but the clown has cancelled. His dad, Kent, finds an old clown suit in the attic and saves the party. But after the party is over, Kent has a problem... the suit won't come off. What starts as a joke quickly turns into a hellish nightmare. Kent can feel himself changing, and his desperate attempts to free himself just leave him in agonising pain.

As the suit takes hold of his body, Kent slowly endures a brutal transformation. As he changes, an uncontrollable hunger begins to consume him, an overwhelming and insatiable hunger... for children.

We like it because:

It's no surprise that "Clown" is such a bloodthirsty success. It went into production after Eli Roth saw a fake trailer for the yet-to-be-made movie and was so impressed he decided to produce the film himself.

The finished product is utterly shameless in its love of splatter and gore, and gets very inventive with its brutality (including a scene in a kids' adventure playground, which is about as shocking as anything you're likely to see in a horror movie).

Even diehard gore-hounds will be impressed, as "Clown" sets out to break taboos and churn stomachs all at once. Horrifying stuff indeed!
