Synopsis:

The year is 2157: Maxim is on a mission in deep space when his ship crashes on an unknown planet. Despite the highly advanced weaponry and technology developed by the planet's tyrannical leaders, he finds the general population suffering under cruel medieval living conditions. After discovering he will never be able to return home, Maxim joins forces with a local girl and her brother and launches an uprising to overthrow the planet's totalitarian system and its mind-controlling dictators. An epic battle commences...

DARK PLANET is an ambitious sci-fi action adventure from the director of Stalingrad and The 9th Company, based on the classic novel; Prisoners of Power.

We like it because:

Dark Planet is a beautifully crafted action sci-fi film that depicts a brutal dystopian society in a stylistic and epic form.

The action sequences are explosive and the characters wholly believable, as is a romantic sub-plot that takes place in this dark and foreboding setting. It's a bone-crunching and complex film that is an absolute must for science fiction fans and fans of high-concept action.
