Synopsis:

Following directly on from the brutal events in the doomed apartment building, TV reporter Ángela is rescued and taken to an oil tanker to undergo examination.

But unfortunately for the soldiers on board, Angela is carrying the seed of the mysterious demonic virus that turns its victims into mindless, bloodthirsty monsters. It's only a matter of time before all hell breaks loose and the carnage begins again...

We like it because:

Not only is this one of the most revered modern horror franchises, it's also one of the most innovative. With each installment it adds new twists and tricks, keeping the series fresh, relevant, and brilliantly brutal.

Now, with the return of both Manuela Velasco and Jaume Balagueró, the franchise has simultaneously returned to its claustrophobic roots and taken things in a completely new direction – what remains consistent though is its commitment to relentless horror, packing the story with nerve-shredding tension and buckets of gore.

Most of all though, [REC] Apocalypse has plenty of fun in the process and like the series overall, there's no downtime – it's all guts and axe-wielding glory, showing once again why the [REC] series put Spanish horror on the mainstream movie map.
