PANTHAKI – 28 Days Later) and Emma Washington (WENDY GLENN – You're Next) - has travelled to the site to unveil the mysteries that led to that horrendous outcome. But what they unearth is something far worse than they could have imagined – the fallen armies, risen, with an agenda to settle the score.

We like it because:

'World War Dead: Rise of the Fallen' works on so many levels. It's scary, its gory and has the right amount of British wit & humour to make it one of the most fun and entertaining Zombie films in ages. The cast work so well together and make you genuinely care what happens to them as they fight for their lives against some truly nasty flesh-eaters.

Its all out zombie war that will keep you on the edge of your seat, or peering from behind the sofa, throughout.
